Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claimed structure of the mounting arrangement is vague and indefinite because of the apparent inconsistency of what elements comprise what structures. Specifically, claim 1 calls for a “mounting arrangement for mounting to a vehicle an engine” and specifies that the mounting arrangement comprises “a core assembly and an outer component”, with a connecting means extending from the core through the outer component. The specification, however, seems to disclose that the core assembly is a part of the engine which is being mounted, not part of the mounting arrangement. Claim 1 is also indefinite because the “transmission means” structure is unclear. The claim specifies that it extends from the connecting means and that it will transfer thrust, but it is not clear to what the other end of the transmission means is connected.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-20 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by any one of GB2,375,513, GB2,360,749, Stanley et al, or Rodgers et al.

See especially Figure 8 of GB2,375,513; Figure 1 of GB2,360,749; Figure 2 of Stanley et al; and Figure 1 of Rodgers et al.

Art Unit: 3644

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Jule et al and Newton et al are cited as being of interest since they disclose aircraft engine mounts.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to J. Woodrow Eldred whose telephone number is 703-306-4151. The examiner can normally be reached on Monday to Thursday, from 8:00 a.m. to 5:30 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Teri Luu can be reached on 703-305-7421. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
